Independent Auditor's Report

The Board of Trustees
Mobridge Regional Hospital
Mobridge, South Dakota

Report on the Financial Statements

We have audited the accompanying financial statements of Mobridge Regional Hospital, which comprise the balance sheets as of September 30, 2021 and 2020, and the related statements of operations, changes in net assets, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and our 2021 audit in accordance with the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The 2020 audit was not required to be conducted in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Mobridge Regional Hospital as of September 30, 2021 and 2020, and the results of its operations, changes in net assets, and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued a report dated June 30, 2022, on our consideration of Mobridge Regional Hospital's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Mobridge Regional Hospital's internal control over financial reporting or on compliance. Note 1 - Organization and Significant Accounting Policies

Organization

Mobridge Regional Hospital (Hospital) operates a 25-bed critical access hospital, a 16-bed assisted living center, an 8-bed senior housing center in Mobridge, South Dakota, and medical clinics located in Mobridge, Timber Lake, McLaughlin, and Selby, South Dakota.

Income Taxes

The Hospital is a South Dakota nonprofit corporation and has been recognized by the Internal Revenue Service (IRS) as exempt from federal income taxes under Internal Revenue Code Section 501(c)(3). The Hospital is annually required to file a Return of Organization Exempt from Income Tax (Form 990) with the IRS. In addition, the Hospital is subject to income tax on net income that is derived from business activities that are unrelated to its exempt purpose. The Hospital has determined it is not subject to unrelated business income tax and has not filed an Exempt Organization Business Income Tax Return (Form 990T) with the IRS.

The Hospital believes that it has appropriate support for any tax positions taken affecting its annual filing requirements, and as such, does not have any uncertain tax positions that are material to the financial statements. The Hospital would recognize future accrued interest and penalties related to unrecognized tax benefits and liabilities in income tax expense if such interest and penalties are incurred.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments with an original maturity of three months or less, excluding assets limited as to use.

Patient and Resident Receivables

Patient and resident receivables are uncollateralized customer and third-party payor obligations. Payments of patient and resident receivables are allocated to the specific claims identified on the remittance advice or, if unspecified, are applied to the earliest unpaid claim. The Hospital does not charge interest on past due patient and resident receivable balances.

Patient and resident accounts receivable are stated net of any contractual and implicit price concessions and then further reduced by an allowance for doubtful accounts. In evaluating the collectability of accounts receivable, the Hospital analyzes accounts for adverse changes in a patient's and resident's or third-party payor's ability to pay that may have occurred subsequent to recognition. Management regularly reviews specific data about receivable balances and its past history with similar cases to estimate contractual and implicit price concessions, and any allowances uncollectible accounts.

The Hospital's October 1, 2019 patient, estimated third-party payor settlements, and other receivable balances were \$3,864,520, \$191,000, and \$88,283.

The Hospital has not adjusted the promised amount of consideration from patients and residents and third-party payors for the effects of a significant financial component due to the Hospital's expectation that the period between the time the service is provided to a patient or resident and the time that the patient or resident or third-party payor pays for that service will be one year or less. However, the Hospital does, in certain instances, enter into payment arrangements with patients and residents that allow payments in excess of one year. For those cases, the financing component is not deemed to be significant to the contract.

Physician and Employee Notes Receivable

The Hospital issues notes to physicians and employees as part of its recruitment process. Notes are repayable over a minimum of a two-year period to a maximum of a three-year period. The notes are issued with forgiveness provisions over the life of the note to encourage retention. Based on historical analysis, it is anticipated that the balance of the notes will be forgiven. At September 30, 2021 and 2020, notes receivable from physicians and employees were \$296,449 and \$311,002. The physician and employee notes receivable are included in other receivables on the balance sheets.

Supplies

Supplies are stated at lower of cost or net realizable value on a first-in, first-out basis.

Assets Limited as to Use

Assets limited as to use include assets held by trustees under indenture agreements and assets restricted under loan agreements. Assets limited as to use also includes the interest in the net assets of the Mobridge Regional Healthcare Foundation. Assets limited as to use that are required for obligations classified as current liabilities are reported in current assets.

Interest in Net Assets of Foundation

Mobridge Regional Health Care Foundation (Foundation), an affiliate of the Hospital, solicits contributions and holds funds on behalf of the Hospital. The Hospital's interest in these funds is recorded as assets limited as to use in the accompanying financial statements as net assets with donor restrictions if donors have placed restrictions on the use of the funds. Changes in the funds held by the Foundation are recorded as changes in net assets of foundation in the accompanying financial statements.

Investments and Investment Income

Investments with readily determinable market values are stated at fair value. The fair value of all debt and equity securities with readily determinable fair values are based on quotations from national and foreign securities exchanges. Certificates of deposit are recorded at historical costs, plus accrued interest. All investments are classified as trading securities, therefore investment income or loss (including interest income, dividends, net changes in unrealized gains and losses, and net realized gains and losses) is included in revenues in excess of expenses unless the income or loss is restricted by donor or law.

Property and Equipment

Property and equipment acquisitions in excess of \$5,000 are capitalized and recorded at cost. Depreciation is provided over the estimated useful life of each depreciable asset and is computed using the straight-line method. The estimated useful lives of property and equipment are as follows:

Land improvements	8 - 20 years
Buildings and improvements	10 - 40 years
Equipment	3 - 25 years

Gifts of long-lived assets such as land, buildings, or equipment are reported as additions to net assets without donor restrictions, and are excluded from revenues in excess of expenses, unless explicit donor stipulations specify how the donated assets must be used. Gifts of long-lived assets with explicit restrictions that specify how the assets are to be used and gifts of cash or other assets that must be used to acquire long-lived assets are reported as net assets with donor restrictions. Absent explicit donor stipulations about how long those long-lived assets must be maintained, expirations of donor restrictions are reported when donated or when acquired long-lived assets are placed in service.

The Hospital considers whether indicators of impairment are present and performs the necessary analysis to determine if the carrying values of assets are appropriate. No impairment was identified for the years ended September 30, 2021 and 2020.

Unamortized Debt Issuance Costs and Bond Premiums

Unamortized debt issuance costs and bond premiums are amortized to interest expense over the period the related obligation is outstanding using the straight-line method, which is a reasonable estimate of the effective interest method. Debt issuance costs and bond premiums are included within the long-term debt on the balance sheets. Amortization of debt issuance costs is included in interest expense in the accompanying financial statements.

Net Assets with Donor Restrictions

Net assets, revenues, gains, and losses are classified based on the existence or absence of donor-imposed restrictions. Some donor-imposed restrictions are temporary in nature, such as those that will be met by the passage of time or other events specified by the donor. Other donor-imposed restrictions are perpetual in nature, where the donor stipulates that resources be maintained in perpetuity. Donor-imposed restrictions are released when a restriction expires, that is, when the stipulated time has elapsed, when the stipulated purpose for which the resource was restricted has been fulfilled, or both.

Donor-Restricted Gifts

The Hospital reports contributions restricted by donors as increases in net assets without donor restrictions if the restrictions expire (that is, when a stipulated time restriction ends or purpose restriction is accomplished) in the reporting period in which the revenue is recognized. All other donor-restricted contributions are reported as increases in net assets with donor restrictions. When a restriction expires, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statements of changes in net assets as net assets released from restrictions.

Contributions are recognized when cash, securities or other assets, an unconditional promise to give, or notification of a beneficial interest is received. Conditional promises to give are not recognized until the conditions on which they depend have been substantially met.

Deferred Compensation

The Hospital has a non-qualified deferred compensation plan that permits eligible employees to defer a portion of their compensation in accordance with the applicable provisions of the Internal Revenue Code. Deferred amounts are not available to employees until a distribution event occurs, as defined in the plan document. The assets are held in the name of the Hospital until paid or made available to the plan participant. The related assets are reported in other noncurrent assets, and the corresponding liability is recorded in other noncurrent liabilities.

Patient and Resident Service Revenue

Patient and resident service revenue is reported at the amount that reflects the consideration to which the Hospital expects to be entitled in exchange for providing patient and resident care. These amounts are due from patients or residents, third-party payors (including health insurers and government programs), and others and includes variable consideration for retroactive revenue adjustments due to settlement of audits, reviews and investigations. Generally, the Hospital bills the patients or residents and third-party payors several days after the services are performed and/or the patient or resident is discharged from the facilities. Revenue is recognized as performance obligations are satisfied.

Performance obligations are determined based on the nature of the services provided by the Hospital. Revenue for performance obligations satisfied over time is recognized based on actual charges incurred in relation to total expected (or actual) charges. The Hospital believes that this method provides a faithful depiction of the transfer of services over the term of the performance obligation based on the inputs needed to satisfy the obligation. Generally, performance obligations satisfied over time relate to patient care in the hospital and clinic settings and residents receiving skilled nursing services. The Hospital measures the performance obligation associated with inpatient acute services from admission into the hospital to the point when it is no longer required to provide services to that patient, which is generally at the time of discharge. The Hospital measures the performance obligation for outpatient and medical clinic services over the patient encounter, which is generally short in duration. The Hospital measures the performance obligation associated with residents receiving skilled nursing services from the beginning of the performance period, generally admission or the beginning of the month, to the sooner of completion of services to that resident, discharge or the end of the month. Revenue for performance obligations satisfied at a point in time is recognized when goods or services are provided, and the Hospital does not believe it is required to provide additional goods or services to the patient or resident.

Because all of its performance obligations relate to contracts with a duration of less than one year, the Hospital has elected to not disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the end of the reporting period. The unsatisfied or partially unsatisfied performance obligations referred to above are primarily related to inpatient acute care services or skilled nursing services to residents at the end of the reporting period. The performance obligations for these contracts are generally completed when the patients are discharged or for residents, the sooner of completion of services, discharge or the end of the month, which generally occurs within days or weeks of the end of the reporting period.

The Hospital determines the transaction price based on standard charges for goods and services provided, reduced by contractual adjustments provided to third-party payors, discounts provided to uninsured patients and residents in accordance with the Hospital's policy, and/or implicit price concessions provided to uninsured patients and residents. The Hospital determines its estimates of contractual adjustments and discounts based on contractual agreements, its discount policies and historical experience applied to a portfolio of accounts. The Hospital determines its estimate of implicit price concessions based on its historical collection experience with the respective class of patients and residents.

Settlements with third-party payors for retroactive adjustments due to audits, reviews or investigations are considered variable consideration and are included in the determination of the estimated transaction price for providing patient care. These settlements are estimated based on the terms of the payment agreement with the payor, correspondence from the payor and the Hospital's historical settlement activity, including an assessment to ensure that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the retroactive adjustment is subsequently resolved. Estimated settlements are adjusted in future periods as adjustments become known (that is, new information becomes available), or as years are settled or are no longer subject to such audits, reviews and investigations.

Consistent with the Hospital's mission, care is provided to patients and residents regardless of their ability to pay. Therefore, the Hospital has determined it has provided implicit price concessions to uninsured patients and residents and patients and residents with other uninsured balances (for example, co-pays and deductibles). The implicit price concessions included in estimating the transaction price represent the difference between amounts billed to patients and residents and the amounts the Hospital expects to collect based on its collection history with those patients and residents.

To fulfill its mission of community service, the Hospital provides care to patients and residents who meet certain criteria under its charity care policy without charge or at amounts less than its established rates. Since the Hospital does not pursue collection of amounts determined to qualify as charity care, they are not reported as net patient and resident service revenue. The estimated cost of providing these services was \$113,000 and \$111,000 for the years ended September 30, 2021 and 2020, calculated by multiplying the ratio of cost to gross charges for the Hospital by the gross uncompensated charges associated with providing charity care to its patients or residents.

Other Operating Revenues

The Hospital participates in the 340B Drug Pricing Program (340B Program) enabling the Hospital to receive discounted prices from drug manufacturers on outpatient pharmaceutical purchases and enter into certain contracts with unrelated pharmacies who provide certain prescription drugs to Hospital patients who receive rural health clinic and outpatient services. This program is overseen by the Health Resources and Services Administration (HRSA) and Office of Pharmacy Affairs (OPA). HRSA conducts routine audits of these programs at health care organizations and monitors program compliance. Laws and regulations governing the 340B Program are complex and subject to interpretation and changes. During the years ended September 30, 2021 and 2020, the Hospital recognized \$1,676,255 and \$1,913,682 of other revenue from operations related to its 340B Program contract with an unrelated pharmacy. Other revenue also includes income from rentals, cafeteria and meals sales, operating grants and other operating transactions.

Other revenue is recognized at an amount that reflects the consideration to which the Hospital expects to be entitled in exchange for providing goods and services. The amounts recognized reflect consideration due from customers, third-party payors, and others. Other operating revenues are generally recognized at a point in time. Primary categories of other revenue include income from other retail revenue, cafeteria revenue, certain facility rent and lease revenue, operating grants and other operating transactions.

Revenues in Excess of Expenses

Revenues in excess of expenses is the performance indicator and excludes unrealized gains and losses on investments other than trading securities, transfers of assets to and from related parties for other than goods and services, and contributions of long-lived assets, including assets acquired using contributions which were restricted by donors.

Advertising Costs

Costs incurred for producing and distributing advertising are expensed as incurred. The Hospital incurred \$75,687 and \$76,314 for advertising costs for the years ended September 30, 2021 and 2020.

Functional Allocation of Expenses

The financial statements report categories that are attributed to program service activities or supporting activities. Accordingly, certain costs have been allocated among the programs and supporting services benefited. The functional expenses report certain categories of expenses that are attributed to more than one program or supporting function. Therefore, expenses require allocation on a reasonable basis that is consistently applied. Costs not directly attributable to a function, such as depreciation and amortization, interest, and other occupancy costs, and certain employee benefit costs are allocated to a function based on a square-footage, usage, salaries, units-of-service basis while the remainder of expenses are allocated on the basis of estimates of time and effort. Note 13 presents the natural classification detail of expenses by function.

Note 2 - Patient and Resident Service Revenue

The Hospital has agreements with third-party payors that provide for payments to the Hospital at amounts different from its established rates. A summary of the payment arrangements with major third-party payors follows:

Medicare – Hospital: The Hospital is licensed as a Critical Access Hospital (CAH). The Hospital is reimbursed for most acute care services under a cost reimbursement methodology with final settlement determined after submission of annual cost reports by the Hospital and are subject to audits thereof by the Medicare intermediary. The Hospital's Medicare cost reports have been audited by the Medicare Administrative Contractor through the year ended September 30, 2019.

Medicare – Clinics: The Mobridge Medical Clinic (Mobridge, SD), West Dakota Health Center (Timber Lake, SD), Selby Medical Clinic (Selby, SD) and West River Health Clinic (McLaughlin, SD) are designated as Provider-Based Rural Health Clinics (RHC) by the Medicare program. As a result, clinical services rendered to Medicare program beneficiaries are reimbursed under a cost reimbursement methodology.

Medicaid: Inpatient acute care services rendered to Medicaid program beneficiaries are paid at prospectively determined rates per discharge. These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Clinical and outpatient services rendered to Medicaid program beneficiaries are reimbursed under a prospectively determined reimbursement methodology based on historical costs. There are no retroactive settlements resulting from the Medicaid program.

Medicaid – Assisted Living: The Hospital is reimbursed for Medicaid assisted living resident services at established billing rates as prescribed by the South Dakota Department of Social Services regulations. These rates are subject to retroactive adjustment by field audit.

Wellmark Blue Cross and Blue Shield: Inpatient services rendered to Blue Cross subscribers are paid at prospectively determined rates per discharge. Outpatient services are reimbursed at outpatient payment fee screens or at charges less a prospectively determined discount. The prospectively determined discount is not subject to retroactive adjustment.

Other: The Hospital has also entered into payment agreements with certain commercial and managed care insurance carriers and other organizations. The basis for payment to the Hospital under these agreements includes prospectively determined rates per discharge, discounts from established charges, and prospectively determined daily rates.

Concentration of revenues by major payor accounted for the following percentages of the Hospital's patient and resident service revenues for the years ended September 30, 2021 and 2020:

	<u>2021</u>	<u>2020</u>
Medicare	35.5%	35.4%
Medicaid	16.1%	14.7%
Commercial insurance	31.1%	33.0%
Other third-party payors, patients, and residents	17.3%	16.9%
	<u>100.0%</u>	<u>100.0%</u>

Laws and regulations governing the Medicare, Medicaid, and other programs are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. The patient and resident service revenue for the years ended September 30, 2021 and 2020, decreased approximately \$17,000 and \$218,000, respectively, due to removal of allowances previously estimated that are no longer necessary as a result of final settlements and years that are no longer likely subject to audits, reviews, and investigations and changes in estimated settlements.

The Hospital has potential settlements with third-party payors for retroactive adjustments that are considered variable consideration and included in the determination of the estimated transaction price for providing patient care. As a result, there is an ongoing level of uncertainty relative to the estimated liability for prior period cost reports.

Generally, patients and certain residents who are covered by third-party payors are responsible for related deductibles and coinsurance, which vary in amount. The Hospital also provides services to uninsured patients, and offers those uninsured patients a discount, either by policy or law, from standard charges. The Hospital estimates the transaction price for patients and residents with deductibles and coinsurance and from those who are uninsured based on historical experience and current market conditions.

The initial estimate of the transaction price is determined by reducing the standard charge by any contractual adjustments, discounts and implicit price concessions based on historical collection experience. Subsequent changes to the estimate of the transaction price are generally recorded as adjustments to patient and resident service revenue in the period of the change. The ability to estimate the collectability of uninsured and other self-pay patients is contingent on the patient's ability or willingness to pay for the services provided. Subsequent changes that are determined to be the result of an adverse change in the patient's and resident's ability to pay are recorded as provision for bad debts. The provision for bad debts for the years ended September 30, 2021 and 2020 was not significant.

The nature, amount, timing and uncertainty of revenue and cash flows are affected by several factors that the Health Center considers in its recognition of revenue. Following are some of the factors considered:

- Payors (for example, Medicare, Medicaid, managed care or other insurance, patient and resident) have different reimbursement/payment methodologies
- Length of the patient’s and resident’s service/episode of care
- Geography of the service location
- Health Center’s line of businesses that provided the service (for example, hospital, physician services, etc.)

Contract Liability – Medicare Advanced Payments

The contract liability balance consists of the remaining unpaid advanced payments received from the Centers for Medicare & Medicaid Services (CMS), in order to increase cash flow for Medicare Part A providers who were impacted by the COVID-19 pandemic. The Hospital received \$3,904,815 in advanced payments during the year ending September 30, 2020, which are recouped through the Medicare claims processed beginning 365 days after the date of issuance of the advanced payments. This recoupment process will continue until the balance of the advanced payments has been recouped or for 29 months from the date that the advanced payments were issued, at which point any remaining unpaid balance is due. The advanced payments balance is non-interest bearing through the 29-month repayment period. The portion expected to be recouped in the next 12 months is included in current liabilities and the portion expected to be recouped in greater than 12 months is presented in long-term liabilities in the accompanying balance sheet. The Hospital did not have a contract liability balance prior to the CMS advance program.

Note 3 - Liquidity and Availability

The Hospital continually determines the necessary amount of funds to hold in cash and cash equivalents to meet operational needs. Cash in excess of operating requirements or funding needed for capital improvements is generally invested. Note 5 - Fair Value Measurements

The Hospital reports certain assets and liabilities at fair value in the financial statements. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal, or most advantageous, market at the measurement date under current market conditions regardless of whether that price is directly observable or estimated using another valuation technique. Inputs used to determine fair value refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability based on the best information available. A three-tier hierarchy categorizes the inputs as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and market-corroborated inputs.

Level 3 – Unobservable inputs for the asset or liability. In these situations, inputs are developed using the best information available in the circumstances.

In some cases, the inputs used to measure the fair value of an asset or a liability might be categorized within different levels of the fair value hierarchy. In those cases, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. Assessing the significance of a particular input to the entire measurement requires judgment, taking into account factors specific to the asset or liability. The categorization of an asset within the hierarchy is based upon the pricing transparency of the asset and does not necessarily correspond to an assessment of the quality, risk or liquidity profile of the asset or liability.

A significant portion of investments are classified within Level 1 because they are comprised of U.S. Treasury obligations, common stock, and mutual funds with readily determinable fair values based on daily redemption values. Certain certificates of deposit are considered invested and traded in the financial markets. Those certificates of deposit, fixed income securities and other securities are valued by the custodians of the securities using pricing models based on credit quality, time to maturity, stated interest rates and market-rate assumptions, and are classified within Level 2.

The following table presents assets measured at fair value on a recurring basis at September 30, 2021 and 2020, respectively, are as follows:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
<u>September 30, 2021</u>				
Deferred compensation plan				
Mutual funds	<u>\$ 782,613</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 782,613</u>
<u>September 30, 2020</u>				
Deferred compensation plan				
Mutual funds	<u>\$ 612,404</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 612,404</u>

The fair value for these securities is determined by reference to quoted market prices.

Substantially all of the Hospital's assets at September 30, 2021 and 2020, are pledged as collateral for the debt obligations.

The Hospital's cash balances are maintained in various bank deposit accounts. At various times during the years ended September 30, 2021 and 2020, the balances of these deposits were in excess of federally-insured limits.

Note 15 - Commitments and Contingencies

Malpractice Insurance

The Hospital has malpractice insurance coverage to provide protection for professional liability losses on a claims-made basis subject to a limit of \$1 million per claim and an annual aggregate limit of \$3 million. The Hospital is also insured under an umbrella liability occurrence insurance policy with a limit of \$2 million. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims based on occurrences during its term, but reported subsequently, would be uninsured.

Litigations, Claims, and Assessments

The Hospital is subject to the usual contingencies in the normal course of operations relating to the performance of its tasks under its various programs. In the opinion of management, the ultimate settlement of any litigation, claims, and disputes in process will not be material to the financial position, operations, or cash flows of the Hospital.

The health care industry is subject to numerous laws and regulations of federal, state, and local governments. Compliance with these laws and regulations, specifically those relating to the Medicare and Medicaid programs, can be subject to government review and interpretation, as well as regulatory actions unknown and unasserted at this time. Federal government activity has increased with respect to investigations and allegations concerning possible violations by health care providers of regulations, which could result in the imposition of significant fines and penalties, as well as significant repayments of previously billed and collected revenues from patient services.

Construction Agreements

The Hospital has entered into agreements for architecture and engineering related to the Hospital's master facility plan. The costs related to these services are billed as incurred.

Note 16 - COVID-19 Stimulus Programs

Paycheck Protection Program

The Hospital was granted a \$1,829,300 loan under the Paycheck Protection Program (PPP) administered by a Small Business Administration (SBA) approved partner. The loan is uncollateralized and is fully guaranteed by the Federal government. The Hospital initially recorded the loan as a refundable advance and subsequently recognized forgiveness when the loan obligation was legally released by the SBA and lender. The Hospital has recognized \$1,829,300 as loan forgiveness income for the year ended September 30, 2021.

Provider Relief Funds

During the years ended September 30, 2021 and 2020, the Hospital received \$-0- and \$3,988,017 of Coronavirus Aid, Relief, and Economic Security (CARES) Act Provider Relief Funds administered by the Department of Health and Human Services (HHS). The funds are subject to terms and conditions imposed by HHS. Among the terms and conditions is a provision that payments will only be used to prevent, prepare for, and respond to coronavirus and shall reimburse the recipient only for healthcare-related expenses or lost revenues that are attributable to coronavirus. Recipients may not use the payments to reimburse expenses or losses that have been reimbursed from other sources or that other sources are obligated to reimburse. HHS currently has varying deadlines to incur eligible expenses and lost revenues, which vary based on the date the funds are received. Unexpended funds will be subject to repayment.

During the years ended September 30, 2021 and 2020, the Hospital also received \$449,462 and \$148,384 through the Paycheck Protection Program and Health Care Enhancement (PPPHEA) for its rural health clinics to conduct COVID-19 testing. This funding may only be used for conducting COVID-19 testing and related expenses, including building or construction of temporary structures, leasing of properties, and retrofitting facilities as necessary to support COVID-19 testing.

These funds are recorded as a refundable advance when received and are recognized as provider relief fund revenues in the accompanying statements of operations as all terms and conditions are considered met. The terms and conditions are subject to interpretation, changes, and future clarification, the most recent of which have been considered through the date the financial statements were available to be issued. In addition, this program may be subject to oversight, monitoring, and audit. Failure by a provider that received a payment from the Provider Relief Fund to comply with any term or condition can subject the provider to recoupment of some or all of the payment. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term.

As of September 30, 2021 and 2020, the Company had a total refundable advance balance related to provider relief funds of \$362,897 and \$3,707,777, respectively, which was included in current liabilities on the accompanying balance sheets. During the years ended September 30, 2021 and 2020, the Company recognized \$3,794,342 and \$428,624, respectively, as revenue, included as provider relief fund revenue on the statements of operations.

Other Stimulus Grants

The Hospital also received \$293,600 from the South Dakota Bureau of Finance and Management and other sources. These funds are subject to terms and conditions imposed by the grantor. The Hospital recognized revenue from these funds of \$293,600 and \$-0- for the years ended September 30, 2021 and 2020, and reported refundable advances of \$-0- on the September 30, 2021 and 2020 balance sheets.

Note 17 - Subsequent Events

The Hospital has evaluated subsequent events through June 30, 2022, the date which the financial statements were available to be issued.

Subsequent to September 30, 2021, the Hospital redeemed the City of Mobridge, South Dakota Health Care Facilities Series 2007 Revenue Bonds. The outstanding balance of the bonds was \$510,000 at the date of redemption.

Subsequent to September 30, 2021, the Hospital entered into a guaranteed maximum price construction agreement related to the Hospital's master facility project. The amount of the construction agreement was \$36,527,626.
